

USING DOUBLE-CYLINDER DEADBOLT LOCKS

DOUBLE CYLINDER DEADBOLT LOCK

Double-cylinder deadbolt locks require a key to open from the inside. When you install these locks, Community Crime Prevention/SAFE strongly recommends that you:

1. Keep a key in or near the lock when you are home so you can exit easily in an emergency.
2. Remove the inside keys when you are away.

If you follow these recommendations, double-cylinder deadbolt locks will provide you with good home security. In addition to all the strengths of other deadbolt locks, double-cylinder locks:

1. Prevent someone from unlocking the door if they break glass in or near your door and reach in.
2. Stop a burglar who has entered a window in your house from leaving by the door. This means it will be difficult for the burglar to take items from your home.

By City ordinance, double-cylinder deadbolt locks can only be installed on single family homes and first floor duplexes. The type of locks you use is up to you. Community Crime Prevention/SAFE and the City of Minneapolis assume responsibility regarding your decision to install or use double-cylinder locks.
