

SW Windom Residential Reconstruction – 2020

Project Background

Public Works has identified street segments in the Windom Neighborhood as the 2020 Residential Reconstruction Program project. The objective of this annual program is to reconstruct residential street segments in various locations across the City that are in poor condition and no longer candidates for resurfacing or rehabilitation.

Project Scope

The City of Minneapolis proposes to reconstruct the following street segments:

- W 61st St – east to Lyndale Ave S
- W 62nd St – east to Aldrich Ave S
- Dupont Ave S – between W 61st St and W 62nd St
- Colfax Lane S - between W 61st St and Aldrich Ave S
- Aldrich Ave S – between Colfax Lane S and W 62nd St

The proposed .86 mile long project is scheduled to occur over the course of the 2020 construction season. The scope of the project will encompass the entire right-of-way and will include full removal of the existing street, subgrade correction, new pavement, curb and gutter, driveways, sidewalks as needed, utility work as needed, and signage. The project will also include streetscape improvements including trees planted in the boulevard.

City staff is currently in the preliminary stages of planning and design for the project, which will be accompanied by community outreach activities that will help inform and guide design concepts. Public Works relies on planning guidance and community input to inform the design of streets.

Project Schedule and Public Input

Public Works intends to advance a layout of these streets for City Council approval in early to mid-2019. Public Works will be engaging stakeholders beginning in the summer of 2018 to understand what design elements are important to consider in the Windom Neighborhood. There may be opportunities to explore unique features and interests specific to the neighborhood as part of this project.
