

Bloomington / Minnehaha Ave

Signalized Intersection Safety Improvements

Project overview

Public Works will improve four intersections in south Minneapolis. These projects will upgrade traffic signals and pedestrian curb ramps at each of the four intersections and may include curb extensions, medians, and lighting. The goal of these improvements is to increase traffic safety for all users.

Project goals

Make traffic signals easier to see and reduce the number of crashes.

Improve safety and shorten distance of pedestrian crossings.

Make areas more accessible by adding ADA-compliant ramps and signals.

Project schedule

Planning

2025 – 2026

Design

2026

Construction

2027

Improvement types

Project improvements will upgrade traffic signal infrastructure and make changes to increase the safety of pedestrian crossings, including:

1. Improved traffic signal visibility.
2. Curb extensions at some intersection corners (center medians may also be used).
3. Accessible Pedestrian Signals (APS).
4. ADA-compliant pedestrian curb ramps.
5. LED Lighting on traffic signal pole.

Transportation Action Plan

This project is aligned with the Transportation Action Plan, the City's vision for safer, greener, and more modern streets that serve all people and all the ways they want to get around.
